

Agricultural Fertilizer Applicator Certification

Training for those with or without a pesticide applicator license

Fulfills certification requirements

This meeting will fulfill the requirement for applicators who need the agricultural fertilizer applicator certification. Those with a pesticide applicator's license will participate in a two hour program and those without a pesticide applicator's license will need to participate in an additional hour of training at the session. Individuals have until September 30, 2017 to become certified as a fertilizer applicator.

Who needs the agricultural fertilizer certification?

Fertilizer certification is required if you apply fertilizer (other than manure) to more than 50 acres of agricultural production grown primarily for sale. If you hire a co-op or other custom applicator to make your fertilizer applications, you do not need the certification.

What will be covered in the training?

Best management practices will be the basis of the agricultural fertilizer certification training with a focus on fertilizer applications that have the appropriate rate, timing, placement and source.

- *Thursday, March 16, 2017 - 10:00 a.m. to 1:00 p.m.* and repeated again on *Tuesday, March 28, 2017 - 6:00 to 9:00 p.m.*
- Both sessions will be held at: *OSU Extension Meeting Room, 225 Underwood St., Zanesville*
- **Pre-registration is required.** Pre-registration is required because of limited space in the room. There is no charge for the program.
- For questions, call the office: 740-454-0144 or email: martin.2422@osu.edu
